Recessed	540
Track	584
Bulbs	590

## OUR PURPOSE

“Faro Barcelona exists to contribute to the wellbeing and happiness of people through design and the relationship we establish with the objects that surround us in our daily lives. We believe in honest and accessible design. Design for everyone.”

Xavier Martin  
CEO

## A BRAND WITH SOUL

“We believe in the power of enthusiasm to move forward and surf the waves the best way we know while enjoying the process and radiating light around us.”

# SUSTAINABILITY

Our sustainability journey focuses on two main objectives: reducing our negative impact on the planet and maximising our positive social impact.

## **People**

### **The value of a great team**

At Faro Barcelona, sustainability starts from the inside, taking care of the well-being and personal growth of our team.

### **Equality and diversity**

At Faro Barcelona all people are great and equal, whatever their gender, age, religion or sexual orientation. Women, as well as men, play an important role: 76% of our team and 49% of our leaders are women.

### **Community support**

For over a decade, we have been collaborating in social projects of foundations providing our help to ensure a better quality of life for the people helped by these organisations. Since 2008, we have had our own social project with Hook, each luminaire sold feeds a child in Africa for one year.

### **Supporting new talent**

We collaborate with universities and design schools to help new talents emerge into their professional development. Projects such as Reborn, a second life for waste (La Llotja), make It design with 3D printing (CIM UPC), are some of the collaborations we have carried out.

### **Social innovation**

We take part in disruptive social innovation research and develop products and services that solve social problems such as the ageing of the population. We have a positive impact on people's quality of life, contributing to their well-being and comfort through quality, accessible and sustainable lighting and design.

## Planet

### Sustainable packaging

Our packaging is made of recycled cardboard boxes printed in one ink and without staples to ease the disassembly and the right recycling.

We have eliminated single-use plastics and replaced them with recyclable paper bags and we use recycled cardboard shavings to protect the product during transport in 60% of our shipments. All our packaging meets Drop Test ISTA-2C quality standards to ensure products arrive in perfect condition.

### More sustainable logistics and transport

We have optimised the packaging size of each product to reduce the amount of packaging material and the carbon footprint of transport. We have opened a new logistics centre in China to supply our Asia-Oceania market in a more sustainable way and reduce carbon emissions from transport.

### Sustainable workspaces

We use green electricity in our offices. We produce 70% of the energy we consume with our own photovoltaic installation, ensuring that the energy is from renewable sources. In addition, our headquarters are designed to maximise the use of solar energy and natural light.

### Supporting new talent Team committed to sustainability

At Faro Barcelona we have an internal sustainability committee that promotes different sustainability actions and monitors them.

## Product

### Sustainability from conceptualisation

In our eco-design decalogue we set out the main guidelines we follow to make our designs more sustainable. We work with external consultants to reduce the environmental impact of our production processes, guaranteeing the quality and safety of our products. We are training our design team in circular design techniques for the more sustainable development of all our products.

### A longer useful life

We work to design timeless, repairable and long-lasting products in order to reduce their environmental impact. We research new methods to ensure that our designs last longer, are easy to repair and can be recycled.

### Standardisation and modularity

We work on the standardisation of components for a more efficient use of resources and more sustainable production. We develop modular collections that allow us greater versatility and more efficient logistics and transport.

### More sustainable processes and materials

One of the major challenges towards a more sustainable production is the choice of materials as it represents more than 70% of the product's carbon footprint. The use of recycled materials or materials with a lower environmental impact, the implementation of new techniques and the reduction of the number of materials used, help us achieve more sustainable manufacturing.

### Control of the supply chain

We share our sustainability vision and commitments with all our suppliers. We, therefore have a supplier code of conduct to ensure a more sustainable supply chain.

## CARBON FOOTPRINT CERTIFICATION

We have achieved certification of our carbon footprint calculation in accordance with the ISO 14064-1 international standard, a major milestone on our path to sustainability.

Thanks to this certification, we know the real volume of greenhouse gas emissions generated by our activity and it allows us to identify areas for improvement and implement compensation strategies through different programs.

We celebrate that we have successfully passed the sustainability audit carried out by EcoVadis, obtaining the prestigious Medal in recognition of our sustainability efforts and achievements.

Both certifications reaffirms our ongoing commitment to sustainability and corporate responsibility in all its facets and operations.

DESIGNERS  
ARTISTS  
CREATORS

They make our world a better place thanks to their ingenuity, talent and creativity.

Espacio Princesa  
Princesa 52 Barcelona

The creativity, ingenuity and design of Faro Barcelona can be found in the heart of the city. Welcome to Espacio Princesa!

Request visit

Docontract MAD  
Velázquez 35-4ºD Madrid

This innovative space has emerged with the purpose of simplifying the work of architects, interior designers and developers looking for solutions for their new construction or renovation projects.

Showroom París  
7 Rue d'Uzès Paris

A space in which to carry out commercial activities such as visits, product demonstrations and meetings, and to develop a calendar of scheduled events to experience first-hand the design concept in lighting and ceiling fans.

## SHOWROOMS

We planned it to be the meeting point for designers, interior designers, architects and creatives to share their concerns and create a whole experience.

At Faro Barcelona, we control the quality of our products and services from conception and design to functionality and reliability tests.

Our quality management system is based on ISO9001.

Compliance with electrical safety regulations under EN60598 and energy efficiency ERP.

TIERRA  
MAR &  
AIRE

by Héctor Serrano

*designed by Héctor Serrano*

**How did the project come about?**

Tierra, Mar and Aire (Earth, Sea and Air) arose from a concern about or interest in two concepts. First, an intention to democratise 3D printing on a large scale by integrating it as another industrial process in light manufacturing. Second, and most importantly, an interest in producing increasingly sustainable products and contributing to circularity. The project is something of a rallying cry encouraging us to consider our relationship with the planet in response to the current climate crisis. Nature does not generate waste: we must learn from it and move towards a more circular and sustainable product.

### **How would you describe the project?**

#### **What does it consist of?**

#### **What is the inspiration?**

The project is organised into three areas: Tierra, Mar and Aire. These are the elements that represent our planet and refer to the origins of the materials from which the lights are made.

The shape of each light is inspired by shapes found in nature as a tribute and to emphasise the respect we should have for nature.

Although each of the collections is independent and entirely visually different due to the materials, they share three essential design features:

#### **Calm:**

These are simple, appealing and timeless shapes that are easy to live with and allow the details of the material to be appreciated.

#### **Honest:**

We avoid adding more elements so we can appreciate and value the nature of the 3D printing process with the grooves. Also, there is no post-processing involving filling or lacquering for sustainability, i.e., the final piece is as it comes out of the machine.

#### **Organic and versatile:**

By not using moulds, we offer shape variations for a more organic language adaptable to architectural needs.

*“Nature does not generate waste: we must learn from it and move towards a more circular and sustainable production.”*

# TABLE & FLOOR

# Studio NEW

Designed by Nahtrang

Studio recovers lines of the 1950s and reinterprets them to fit into a modern context.

The main feature of its design that makes it unique is the way the cable is attached to the structure.

Table & Floor

# Treewood NEW

Designed by Faro Lab

Its oak structure and parchment shade are reminiscent of the Scandinavian aesthetics of the 1950s.

Treewood Tray Ref. 20057

# Luang

**Designed by** Faro Lab

Inspired by the Southeast Asia culture and its way of creating objects from paper art.

It is a design of proximity manufacturing: its structure is produced in Spain and its shade in Bulgaria.

# Studio NEW

Designed by Nahtrang

Studio brings back lines from the 1950s and reinterprets them to fit into a modern context.

Studio 290 Ref. 28287

Studio 110 Ref. 28277

The main feature of its design that makes it unique is the way the cable is attached to the structure.

# Costas

Designed by Àlex & Manel Lluscà

It is handmade, which reduces the impact on the planet.

It brings a Mediterranean touch to the space where you place it.

It brings a  
Mediterranean  
touch to the space  
where you place it.

It is handmade, which reduces  
the impact on the planet.

This plaster luminaire is fully integrated into the wall.

As it is made of plaster, it can be painted the same colour as the wall and integrate it into the space.

TRUE BEAUTY  
RESIDES  
IN SIMPLICITY.  
IN EVERY SMALL  
MOMENT WE  
DISCOVER  
THE EXTRAORDINARY.
