Cuca by Faro Lab

designed by Faro Lab

Cuca is a collection of indoor lamps brought outdoors, born from the trend of recent years to spend more time in outdoor spaces. The living space has expanded onto terraces and gardens, regardless of the time of year, an essential factor in conceiving the design of this luminaire. With rounded, fluid, and simple shapes, Cuca blends with the natural environment and evokes fireflies, creating touches of ambient light that dot the outdoor space. With beacons and stakes available, this collection allows for creating compositions of light at different heights and scenes with various lighting effects. Its minimalist structure in the form of a half-circle arch integrates into the vegetation and lifts and shifts the light source, creating a floating effect of light points in the environment. A complete lighting scenario. For ease of repair, Cuca is fully detachable, which extends the lifespan of these luminaires.

Cuca es una colección de lámparas de interior llevadas al exterior, fruto de la tendencia de los últimos años de vivir los espacios exteriores durante más tiempo. El espacio habitable se ha extendido hacia terrazas y jardines, independientemente de la época del año, factor esencial al concebir el diseño de esta luminaria. De formas redondeadas, fluidas y simples, Cuca se funde con el entorno natural y evoca las luciérnagas creando toques de luz ambiental que salpican el espacio exterior. Al contar con balizas y estacas, esta colección permite crear composiciones de luz en distintas alturas y escenas con diversos efectos lumínicos. Su estructura minimalista en forma de arco de medio punto queda integrada en la vegetación y eleva y desplaza la fuente lumínica creando un efecto de puntos de luz que flotan en el entorno. Todo un escenario lumínico. Para facilitar la reparabilidad, Cuca es totalmente desmontable, lo que permite alargar la vida útil de estas luminarias.

“Its minimalist stainless steel structure in the shape of a semicircular arch raises generating elegant and minimalist scenographic spaces”.
