FOCUSON

designed by Héctor Serrano

Isabelle is characterised by the delicate treatment of its undulating texture that runs throughout the luminaire. Its shapes are reminiscent of elegant vases with gentle and sweet forms that convey warmth. The opal glass diffuser emits a soft, warm light filtered by its waves that change in width to adapt to the volume. The waves generate a play of shadows and lights that give richness and personality to the pieces. Pieces that are as beautiful lit as they are unlit and can be integrated into any type of space, both domestic and contract. The family is made up of three models that complement each other perfectly, being able to be implemented in the space individually or as a whole depending on the architectural needs.

Isabelle se caracteriza por el delicado tratamiento de su textura ondulada que recorre toda la luminaria. Sus formas evocan a elegantes jarrones con formas amables y dulces que transmiten calidez. El difusor de vidrio opal emite una luz suave y cálida tamizada por sus ondas que van cambiando de anchura para ir adaptándose al volumen. Las ondas generan un juego de sombras y luces que le dan riqueza y personalidad a las piezas. Piezas tan bellas encendidas como apagadas que se integra en cualquier tipo de espacio, tanto doméstico como contract. La familia está formada por tres modelos que se completan perfectamente, pudiendo implementarse en el espacio individualmente o en conjunto dependiendo de las necesidades arquitectónicas.

“Three models that can be implemented individually or together depending on architectural needs.”
