Pure geometry and color
Geometría y color en estado puro

The concept of the new Maya luminaire was born to create a versatile product that can be used both as a table lamp or as a wall lamp and with a single point of light to generate a warm atmosphere thanks to its opal glass. Sustainability is an important factor in the design of this luminaire since the light intensity is adjustable and can be adapted to different lighting needs without using indiscriminately the maximum power.

El concepto de la nueva luminaria Maya nace para crear un producto versátil, que tanto pueda utilizarse como lámpara de sobremesa o como aplique y con un único punto de luz para generar una atmósfera cálida gracias a su cristal opal. La sostenibilidad es un factor importante en la concepción de esta luminaria ya que la intensidad de la luz es regulable y se puede adaptar a distintas necesidades de alumbramiento sin utilizar de forma indiscriminada la máxima potencia.

“Maya’s aesthetics of rounded and cozy shapes, aims to generate a sense of closeness and accessibility to become an object of bonding with the user.”
